

CGR4M0 Grade 12 Environmental and Resource Management
Human Systems

Open a new Word page with the title from above. Go online to complete both parts 1 and 2.

Part 1

Define the following terms and show the math formula to find each:

- 1) birth rate
- 2) death rate
- 3) natural increase rate
- 4) immigration rate
- 5) emigration rate
- 6) net migration rate
- 7) population growth rate

Part 2

In the 1960s, historian W.W. Rostow perceived society's development in stages that were linked primarily to economic events. These stages identified important activities such as economic specialization, trade of goods, industrialization, diversification, and consumption. His stages are as follows:

- 1) Traditional Society
- 2) Traditional stage (the preconditions for takeoff)
- 3) Take off
- 4) Drive to Maturity
- 5) High Mass Consumption

Find some information on each of Rostow's five stages. (Just Google "rostow's stages of economic development.") On your Word page, summarize the major details of each of the five stages.
