

CGR4M0 Grade 12 Environmental and Resource Management  
**Impacts of the Water Supply – Part 2: Presentation**

This short project can be done with a partner or on your own. You (and your partner) are to choose a water supply topic from below (or a topic of your choice that you clear with the teacher), design a slide show within the restrictions in part 2 and 3. We will have a chance to present our projects when we have completed them.

1. **Research** one of the following water issues:
  - a. Groundwater
  - b. Irrigation
  - c. River Diversions
  - d. Aquifer Depletion
  - e. Pollution in the Oceans
  - f. Harvesting the seas
  
2. **Create** a computer presentation that does 3 things:
  - a. Identifies the issue
  - b. Explains its impact
  - c. Suggests solutions to the problem
  
3. The computer presentation should include:
  - a. Between 8 and 12 slides
  - b. An additional title slide
  - c. An additional bibliography slide
  
4. You and your partner will be given an opportunity to pick a time and present your project.
